

BEANS KENTUCKY WONDER

. (Old Homestead). Heirloom. 58 days. Green pole bean. 8 inch thick, oval beans

BEANS TENDERGREEN

.53 days. Bush habit, stringless. 6 in. pods are rich green and outstanding in tenderness and rich flavor. Ideal for canning or freezing. Disease resistant.

BEETS DETROIT DARK RED

.Heirloom. 55 days. Short top, globe shape. The most popular garden variety

BROCCOLI PREMIUM CROP

(F-1 Hybrid). (All America Winner - 1975). 58 days. Very early, large heads that are firm with small beads. Vigorous grower, very uniform

BRUSSEL SPROUTS JADE CROSS

F-1 Hybrid). (All America Winner - 1959). 85 days. Is early, has excellent color and is very productive. An outstanding variety.

CABBAGE RUBY PERFECTION

(F-1 Hybrid). 80 days. Solid 6-8 in., 2-3 lb., deep red heads are slow to burst

CABBAGE STONEHEAD

(F-1 Hybrid). (All America Winner - 1969). 50 days. Yellow resistant. About 6 in. very solid heads with a short core makes storage and spacing ideal. Slow to bolt

CABBAGE SWELLHEAD

(F-1 Hybrid). 95 days. An excellent late hybrid. Very solid, 6 lb. heads form early, but keep growing. Excellent holding ability, long standing and yellow resistant

CAULIFLOWER SNOW CROWN

(F-1 Hybrid). (All America Winner - 1975). 50 days. Early and vigorous growing snowball type. Head is well rounded, very smooth pure white, weighing about 2 lbs. and of excellent quality. Ideal for fresh or frozen market use

COLLARDS GEORGIA

70 days. Non-heading, juicy blue-green wavy leaves will stand light freezing which improves the cabbage-like flavor

CORN PEACHES & CREAM

83 days. Ears are 8 1/2 in. long by 1 3/4 in. in diameter. 18-20 rows of kernels. Long flat leaf with good ear cover

CUCUMBER, PICKLING PIONEER

(F-1 Hybrid). 48 days. A gynoecious, black spine, medium green pickling cucumber. Will produce an excellent quality of high yielding, uniform fruit. This variety is disease resistant and very popular in northern areas

CUCUMBER, SLICING SALAD BUSH

F-1 Hybrid). (All America Winner - 1988). 57 days. Very compact growing plants, great for pots, tubs and limited space gardens (including hanging baskets and patio containers). Very productive 6-7 in. straight, dark green slicing cucumbers. Multiple disease resistant. A very heavy producing variety. Five plants will produce about ninety beautiful fruits.

CUCUMBER, BURPLESS BURPLESS NO. 26

(F-1 Hybrid). 60 days. Tasty Green. A new variety for those who shun cucumbers as being bitter and indigestible. They should be picked and eaten like celery when they are young; no peeling since the skin is soft and tender. Stake for best results. 9 in. long and 1-1/2 in. in diameter. Suited for greenhouse culture

CUCUMBER, SLICING STRAIGHT 8

(All America Winner - 1935). Heirloom. 58 days. Early, dark green skinned, 8 in. fruits. Disease resistant

CUCUMBER, PICKLING HOMEMADE PICKLES

55 days. Bush type. This variety was developed for the home gardener and home pickling use. A heavy producer of solid, crisp pickles. Can be harvested when 2 in. long or full maturity at 5 in. A very high yielding variety. Over an eight week period, ten plants yielded about 450 fruits or an average of 45+ fruits per plant.

CUCUMER, PICKLING WHITE MINIATURE

A vigorous producer of small, white pickling cucumbers. Delicious for fresh eating. Thin-skinned, tender fruits are accompanied by a mild, sweet flavor with absolutely none of the bitterness typical in most white cucumbers. Black spine.

CUCUMBER, SLICING BURPEE HYBRID II

(F-1 Hybrid). 55 days. An excellent improved variety for the home garden, market grower, shipper and greenhouse culture. Fruits are dark green with white spines, 8 in. or more long and 2-1/4 in. across. A high yielding, disease resistant variety.

CUCUMER, SLICING MARKETMORE 76

66 days. Dark green fruits are 8 in. long and 2 1/2 inch in diameter.

DILL LONG ISLAND MAMMOTH

30 in. A favorite seasoning with many uses. For over 3,000 years Dill has been used as a digestive aid. It helps relax the muscles of the digestive tract and act as an antifoaming agent in preventing the formation of intestinal gas bubbles and in controlling diarrhea. This herb variety is more compact growing than the standard garden variety. Annual

EGGPLANT DUSKY

(F-1 Hybrid). 60 days. A very early, dark purple 8 x 3-1/2 in. variety, well suited for northern regions where seasons are short and full maturity is important. Disease resistant.

EGGPLANT LONG PURPLE ITALIAN

Heirloom. 70-80 days. Dark purple with a green calyx. Slender and cylindrical, fruits become about 8 in. long and are mildly flavored. This variety dates back to the 1850's in America. A classic Italian eggplant, best when harvested young. Wonderful for adding to stir-fries or any eggplant dish.

EGGPLANT TYCOON - MILLIONAIRE

(F-1 Hybrid). Ichiban Improved. 59 days. A definite improvement over Ichiban with a smaller seed cavity. Shiny, medium purple fruit is shaped long (8-10 in.) and very slim (1-1/4 in.), similar to a cucumber. Adaptable for slicing, frying and baking. Heavy producer.

EGGPLANT, F-1 HYBRID VITTORIA

(F-1 Hybrid). An Italian type variety producing 9 x 2-1/2 in. cylindrical fruit throughout the season on 36 in. plants.

EGGPLANT WHITE

70 days. White 6 in. fruits that are 2-1/2 in. in diameter.

ENDIVE BATAVIAN BIANCA SALAD

Heirloom. 40 days. The baby leaves are finely cut and fringed. Leaves are light green with a pink accent. Good growth habit under adverse weather conditions, easy blanching. Zones: 4-

ENDIVE BATAVIAN FULL HEART

90 days. Large thick dark green leaves, compact head, easy blanching. Zones: 4-7

KALE DWARF GREEN CURLED

Finely curled bluish green leaves

KOHLRABI EARLY WHITE VIENNA

55 days. Mild creamy white flesh; when cooked has a more delicate flavor than turnips. Edible bulb grows above the ground and should be eaten when young (2-2 1/2 in. across)

LEEK BROAD SCOTCH

London Flag. Heirloom. Thick, straight necks. A close relative within the Allium family, popular since ancient cultivation. A welcome addition to sauces, gravy and soups.

LETTUCE SALAD BOWL RED

50 days. Leaf type. Large upright, long deep lobed bronze leaves with bronze-red inner blanched leaves. Good keeper and decorative. Slow to bolt for long harvest.

LETTUCE MESCLUN MIXTURE

(Bon Vivant Blend). 25 days. Contains only Lettuce varieties: Oak Leaf, Paris Island, Prizehead, Red Sails, Salad Bowl, and Simpson Elite. Mesclun is a French term for a mixture of tender, young red and green lettuce leaf varieties. Shake each package before sowing, to provide a balanced blend, begin harvesting in 3 weeks by trimming off the tops of the young plants.

LETTUCE BLACK SEEDED SIMPSON

Heirloom. An excellent variety that stands heat well

LETTUCE BABY STAR

4-5 in. - 65 days. Romaine type. Miniature romaine type with crisp texture and dark, shiny green leaves. Holds against early bolting.

LETTUCE BIBB FORCING

Heirloom. 60 days. Bibb type. Fine flavor, dark green leaves, firm and tender. Good for forcing.

LETTUCE BUTTERCRUNCH

(All America Winner - 1963). 60 days. Bibb type. Quite compact, heavy butterhead; crisp, but juicy. Should replace regular Bibb. Very tender

LETTUCE RED SAILS

(All America Winner - 1985). 45 days. Leaf type. Loose-leaf type with an open head forming a full center. Crinkled leaves are a bronze-red color containing nutritional vitamins A and D.

MELON HONEY DEW

90 days. Very sweet green flesh. Fruits are 8 in. long and 6 in. across with smooth ivory skin.

WATERMELON SWEET FAVORITE

(F-1 Hybrid). (All America Winner - 1978). Early, highly productive variety. Fruits are oblong, light green with dark green stripes and weigh about 20 lbs. each. The interior is a deep red with very small seeds and a sweet delicious flavor. Disease resistant to anthracnose and fusarium wilt

MUSKMELON, CANTALOUPE BURPEE HYBRID

(F-1 Hybrid). 82 days. The heavily netted fruits are distinctly ribbed, round to slightly oval, averaging 7 in. long, 6 in. across and weigh 4 to 4 1/2 lbs.. Flesh is deep orange, thick, firm, juicy and one of the most delicious flavor. Vines are vigorous growing and produce good early yields of large fruited melons

OKRA ANNIE OAKLEY II

42 days. A high yielding, spineless hybrid. Compact plant that allows high-density planting. Pods are long and slender with a high degree of uniformity and holds well at tender state. Early maturing variety when compared to open pollinated varieties.

OKRA CAJUN DELIGHT

500 S. (F -1 Hybrid). (All America Winner - 1997). 50 days. Early maturity and heavy yields distinguish this superior variety. Very tender pods a great flavor

ONION EVERGREEN LONG WHITE BUNCHING

Heirloom. 100 days. Long, silvery white stalks. Does not form bulbs under moist conditions

ONION RED BURGUNDY

95 days. Red Hamburger. Smooth, glossy skin, purplish-red in color. Flesh is white with pink shading near the skin. Good keeper. Short day.

ONION VIDALIA

80 days. Very sweet with light yellow flesh and oblate in shape. High yielding variety with consistently uniform production. Short day

ONION WHITE SWEET SPANISH

110 days. White skin, 5 in. across globe shaped. Quite mild, sweet white flesh. Good keeper. Bunching type.

PEAS SUGAR SNAP

(All America Winner - 1979). 70 days. The entire pod can be eaten when fully mature. The pod flesh is thick and tender and filled with very sweet, delicious peas

PEPPER, MILD JOE E PARKER

S. 65-80 days. Produces heavy yields of 7 in. long by 1 1/2 in. wide fruits which turns from green to red when mature. A Southwest favorite for stuffing (chile rellenos), grilling and roasting. The flesh is thick and crisp with a delicious mild heat and richly satisfying chile flavor. 1,500-3,000 Scovilles.

PEPPER, MILD POBLANO

75 days. Slightly hot, with a sweet flavor. Dark green 6 in. x 3 in. fruits mature to a chocolate-green color. Thick walled fruits are ideal for fresh use, stuffing, roasted and used in rellenos or dried as an ancho. 3,000 Scovilles

PEPPER, SWEET CAJUN BELLE

(All America Winner). 61 days. Small bell peppers about 2 in. x 3 in. with 3-4 lobes. Fruits are both sweet and mildly spicy. When left on the plant, fruits will change color from green to scarlet and finish red, filled with vitamin C. Compact plants are 2 feet tall and wide, a perfect stature for containers. Delicious when just picked and can also be enjoyed green or red for salsas.

PEPPER, SWEET CHOCOLATE BEAUTY

70 days. Dark green skin ripens to a dark brown. Sweet, non-pungent fruits are 4 in. x 3 1/2 in. across. An interesting novelty to add color to your salads and cooking. Disease resistant.

PEPPER, SWEET GIANT MARCONI

30 in. - (F-1 Hybrid). (All America Winner - 2001). 72 days. Bred in Italy, an early, heavy yielding variety that produces 6-8 in. green fruits that mature to a bright red. About 3 in. wide at the top, 3 lobed. A thin skinned variety that can be used in salads, roasted on the grill, or pan fried with tomatoes and egg plant. A heavy yielding hybrid of the Melrose type with all America honors. Disease resistant.

PEPPER, SWEET GYPSY

(F-1 Hybrid). (All America Winner - 1981). 60 days. Very early, heavy producer. Fruits 5 x 3 in. long and are mostly 3-lobed with a pendant wedge shape. In the early stages, fruits are a yellowish-green color turning to orange-red when ripe. Compact growing variety that is disease and virus resistant. This variety is the leader in early, high yields. On an average, each plant will produce 35-38 fruits.

PEPPER, HOT CARIBBEAN RED

100 days. VERY HOT, about twice the heat of Habanero! Fruits are 1 1/2 x 1 in. and mature to a bright red. Excellent in salsas, chutneys, marinades and sauces. 450,000 Scovilles.

PEPPER, HOT JALAPENO

72 days. Dark green tapered fruit 3 x 1 in. , turning red. Good for picking or fresh market. 3,500 Scovilles.

PEPPER, HOT KUNG PAO

85 days. The 30 in. tall plants are covered with 4-5 inch green and red peppers that are only 3/8 inch wide. Very popular with stir-fry and Asian cooking. A hot pepper that can be eaten by some in seasoned dishes. 10,000 Scovilles.

PEPPER, HOT SCOTCHBONNET ORANGE

75-100 days. Flaming-hot orange variety extremely hotter than habanero! Great for adding heat to salsas, sauces, chili and any Mexican or Caribbean dish. Pickle it if you dare, but not for the faint of heart. Rounded 2 in. fruit ripens from green to orange. 200,000- 350,000 Scovilles

PEPPER, HOT MUCHO NACHO

(F-1 Hybrid). 68 days. A larger version of Jalapeno that develops to 4 in. long. Fatter, thicker, and hotter than the standard Jalapeno. Dark green, turning to red when ripe. Disease resistant. The red fruits are often smoked over mesquite wood. Once dried and smoked, they are called "Chips o' the Chiles".

PEPPER, HOT SERRANO CHILI HOT

(Red Chilli Hot). Heirloom. 75 days. Very pungent fruit, 2 1/4 in. long and 1/2 in. in diameter. Slim, club shaped green peppers with medium thin walls maturing to a bright red color on 30 in. tall plants. 30,000 Scovilles.

PEPPER, HOT SUPER CHILI

(F-1 Hybrid). (All America Winner - 1988). 75 days. A hybrid producing 2 1/2 in. x 1 1/2 in. cone shaped, elongated green fruit, turning red at full maturity. Semi-compact habit, well branched, heavy producer of very hot fruits. One of the most pungent chili peppers. Grows in upright clusters, turns orange, then ripens to red. Often used in Thai and Asian dishes. 80,000 Scovilles.

PEPPER, HOT THAI HOT

70 days. Very hot variety. Small, slim dark green peppers that are about 1 in. long. When mature, they will ripen to a bright red and are very hot. Both colors appear on the plant at the same time, making this variety ornamental as well as edible. Thin-fleshed peppers are ideal in Asian dishes. A heavy producer of fruits. 35,000 Scovilles.

PEPPER, MILD GARDEN SALSA

73 days. Beautifully shaped fruits are 8 in. long by 1 inch in diameter. Skin is smooth with medium thick walls and tapers to a point. Green fruit will turn red at full maturity. Ideal for making homemade salsa, not quite as hot as Jalapeno with a pungency rating of medium. 2,500-4,000 Scovilles.

PEPPER, MILD JALAPENO TAM MILD

67-73 days. The gringo pepper, very tasty mild Jalapeno type, with the same delicious flavor, but a lot less heat. Freezes and cans well, good for pickling, prolific producer, excellent yields and can be eaten raw, roasted or pickled.

PEPPER, SWEET MINI BELLE SERIES RED

24 in. - 65 days. Plants will produce an abundance of 1 1/4 x 1 1/4 in. miniature fruits. They are sweet, gorgeous and delicious! Fits nicely into small garden space or patio planters, making it just right for the home gardener. Excellent for gourmet dishes, stuffing and salads. Disease resistant. Ripens from green to red.

PEPPER, HOT CHILE DE ARBOL

80 days. Narrow, curved chiles that start out green and mature to bright red. Very hot and resembles a little Cayenne pepper. Be careful during preparation, these are the ones that are dried after turning red and used in many holiday wreaths. 15,000-30,000 Scovilles

PEPPER, HOT FRESNO CHILE

75-80 days. Produces good yields of 3 in. long by 1 1/4 in. wide hot peppers. Fruits turn from green to red when mature. Excellent for roasting, pickling, or for making salsa. Tobacco Mosaic resistant. 5,000-10,000 Scovilles.

PEPPER, HOT HOLY MOLE

24-36 in. - (F-1 Hybrid). (All America Winner-2007). 85 days. The fruits measure 7-9 in. in length and 1 1/2 in. in width, and mature from green to a dark chocolate brown color. This pepper has a distinct taste, but not an overly spicy one. Can be sliced and placed on top of pizza or included in an enchilada casserole or mixed with your favorite Chipotle chicken dish. Mature brown peppers can be dried and ground for later use. 700 Scovilles.

PEPPER, HOT INFERNO

(F-1 Hybrid). 60 days. A heavy yielding, moderately hot banana pepper. Large 1 1/2 in. x 8 in. fruits are ultra smooth with medium thick flesh and outstanding flavor. The fruits will mature from yellow to red. 12,000 Scovilles.

PEPPER, HOT IXTAPA

24 in. – (F-1 Hybrid). 75-80 days. Jumbo size, disease resistance and productivity, a nearly perfect Jalapeno. Large fruit of 3-4 x 1 1/2 in. mature from green to red, taper to a point and are thick walled. Great in salsa, cut into rings for nachos and stuffed for a sizzling appetizer. Not for the faint at heart, be sure to serve with a cold drink. 5,000 Scovilles.

PEPPER, SWEET PURPLE BEAUTY

70 days. A truly PURPLE pepper. The 4 in. x 3 1/2 in. blocky fruits have thick flesh and is highly productive. An interesting novelty to add color to your salads and cooking.

PEPPER, SWEET RED BARON

70-72 days. An early-main season bell with excellent red quality that works well for fresh market or processing, The smooth, blocky, thick-walled fruits are medium large and mature from green to red. Resistant to Tobamo Po.

PEPPER, SWEET SPANISH SPICE (ITALICO)

(F-1Hybrid). 65-70 days. Non-pungent variety - not hot or sweet, but spicy. Dark green fruits are about 7 in. long by 1 3/4 in. across and thin walled for quick frying and grilling. Dark green fruits turn red when mature

PEPPER, SWEET SUPER HEAVYWEIGHT

26-28 in. - (F-1 Hybrid). 75 days. Unusually large size measuring 5 in. x 6 in. long. Beautiful, thick walled fruit is 4-lobed and ripens from jade green to a bright yellow gold. Very flavorful. Disease resistant.

PEPPER, SWEET VALENCIA (ORANGE)

70 days. 4 1/2 in. x 3 1/2 in. blazing orange fruits. An early, heavy yielding variety. Disease resistant.

PEPPER, HOT ANAHEIM

77 days. Very pungent chili type. Long, tapered dark green fruits 7 in. long by 1 1/2 in. wide turning red when ripe. Popular in Chili-relienos. 3,000 Scovilles

PEPPER, HOT CAYENNE (LONG SLIM RED) Heirloom. 70 days. For pickles, canning or drying. Long skin, 6 x 1/2 in. green fruits turning red when mature. 5,000 Scovilles.

PEPPER, HOT HUNGARIAN YELLOW WAX HOT

(Hungarian Hot Banana). Heirloom. Tapering 6 in. x 1 1/2 in. long fruit is yellow, turning red when mature. 4,000 Scovilles.

PEPPER, SWEET BELL BOY

(F-1 Hybrid). (All America Winner - 1967). 70 days. 4 1/2 x 3 1/2 inch . Fruits are uniformly thick walled, 4 lobed deep glossy green. An early, heavy yielding variety that is disease and virus resistant.

PEPPER, SWEET BIG BERTHA

(F-1 Hybrid). 70 days. The largest pepper on the market. Fruits are deep green with thick flesh. It is not unusual for fruits to reach 8 to 10 in. long and 4 in. across. Great for salads and stuffing.

PEPPER, SWEET BOUNTY

(F-1 Hybrid). 65-70 days. A hybrid version of a Sweet Banana type. Very early, fruit are typically 9-10 in. long and 2 in. wide. Yellow to bright red.

PEPPER, SWEET FRIARELLO (MELROSE)

Melrose-type pepper. Ideally suited as a frying pepper with long fruits and thin skin.

PEPPER, SWEET GIANT MARCONI

30 in. - (F-1 Hybrid). (All America Winner - 2001). 72 days. Bred in Italy, an early, heavy yielding variety that produces 6-8 in. green fruits that mature to a bright red. About 3 in. wide at the top, 3 lobed. A thin skinned variety that can be used in salads, roasted on the grill, or pan fried with tomatoes and egg plant. A heavy yielding hybrid of the Melrose type with all America honors. Disease resistant.

PEPPER, SWEET GOLDEN SUMMER

(F-1 Hybrid). 67 days. Early, 4 lobed 4 in. x 3 in. blocky fruits ripen from lime-green to a bright golden yellow. Disease resistant.

PEPPER, SWEET GYPSY

(F-1 Hybrid). (All America Winner - 1981). 60 days. Very early, heavy producer. Fruits 5 x 3 in. long and are mostly 3-lobed with a pendant wedge shape. In the early stages, fruits are a yellowish-green color turning to orange-red when ripe. Compact growing variety that is disease and virus resistant. This variety is the leader in early, high yields. On an average, each plant will produce 35-38 fruits.

PEPPER, SWEET PEPPERONCINI (Italian Pepperoncini).

65 days. For picking, canning, or salads. Tapered green fruit is 4 in. long and 3/4 in. wide. Very useful in the early stages, but will turn bright red when mature

PEPPER, SWEET PIMENTO ELITE

(F-1 Hybrid). 72 days. A heavy producer of sweet, oval to heart-shaped fruit 3 in. x 3 1/2 in. with thick fleshy walls. Green, turning red when ripe. Disease resistant.

PEPPER, SWEET PIMENTO PERFECTION

Heirloom. 73 days. Standard sweet variety for home and market. Heart-shaped, smooth fruit 3 1/2 x 2 1/2 in. High yielding plant produces heavy-walled, heart-shaped fruit that starts green and matures to red. A mild, sweet pepper ideal for salads, garnishes and canning

PEPPER, SWEET ROUMANIAN SWEET

Heirloom. 50 days. Smooth, pale yellow fruits are 4 in. long, tapering to 2 in. at the tip, maturing to a bright red when ripe. Although called sweet, this variety does have a slight bite and is considered mild/hot by some. Ideal for frying.

PUMPKIN JACK O LANTERN

75-115 days. All around great pumpkin for carving. Oblong fruits weigh 10-18 lbs. Smooth medium-orange skin with shallow ribs. Sweet fine grained pale orange flesh makes this also good for cooking.

PUMPKIN MINI WHITE (BABY BOO)

95 days. Miniature variety, grows like Tiny or Jack Be Little. Immature fruits retain the best pure white color and best results are obtained when planted 2-4 weeks later than normal planting dates. A real novelty.

RADICCHIO RED (RED CHICORY)

90 days. This is the Chioggia type; 8 oz., rounded heads, burgundy red color with white veins. A very healthy vegetable, aids digestion and is a tonic for the liver and blood. Use in salads, boil, grill or sauteed.

SQUASH EARLY BUTTERNUT

(F-1 Hybrid). (All America Winner - 1979). 85 days. Winter Squash. A smooth fruited winter variety with semi-bush habit and moderate vine spreading. Very productive, heavy yielding, with excellent flavor

SQUASH PAGODA GOLD

(F-1 Hybrid). 42 days. Summer golden scallop Squash. High yielding, early maturity, meaty flavorful fruits that are best when harvested 5 inches across or less. Outstanding baked, boiled, or fried. Semi bush habit. Disease resistant.

SQUASH PETER PAN

F-1 Hybrid). (All America Winner - 1982). 50 days. A very early, heavy producing bush scallop squash with a pale green tint to the fruit. Flesh is very tender

SQUASH TABLE ACE

(F-1 Hybrid). 70 days. Winter squash. An improved acorn type with semi-bush habit. Fruits are 4-6 in., dark green, flesh is bright orange, thick and textured.

SQUASH, ZUCCHINI ARISTOCRAT

(F-1 Hybrid). (All America Winner - 1973). 50 days. Baby Zucchini. Dark green, smooth skin, 7 in. High yielder

SUNFLOWER MAMMOTH (JUMBO)

Heirloom. Plants have large, 12 in. heads. Stalks are quite tall with giant flowers. They are excellent for background plantings or screening purposes. Weeks to flower: 9-10.

SWISS CHARD BRIGHT LIGHTS

20 in. -. (All America Winner - 1998). Maturity is 28 days for baby salad leaves or 55 days for mature bunching sized leaves. An attractive multicolored swiss chard with various colored stems including gold, pink, red, and white. Outstanding in a salad or for bunching.

SWISS CHARD LUCULLUS

20 in. - Heirloom. 52 days. Most popular type; yellowish-green leaves, heavily crumpled. Wide with broad white ribs

TOMATO, SMALL FRUITED BLACK CHERRY

64 days. The incredibly sweet, fruity flavor is as appealing as the fruit is genuinely beautiful. Dark, chocolatey colored fruits are perfectly round, 3/4" in diameter. Irresistible right off the vine. A unique addition to the color spectrum of cherry tomatoes that are now available. Indeterminate stake habit

TOMATO, SMALL FRUITED RED ROBIN

55 days. A dwarf variety of cherry tomato for container growing, hanging baskets, windowsill or patio growing. Plants remain 8-12 in. tall and bear masses of 1-1/4 in. fruit with a mild, sweet flavor. Very tender skin and good taste even when fruit

TOMATO, SMALL FRUITED SUNGELLA

70 days. A new larger fruited Sungold! Heavy producer of 2 oz. sweet, low-acid, orange fruit. Indeterminate stake habit.

TOMATO, SMALL FRUITED SUNSUGAR TMV

62 days. Each plant will produce many clusters of 1/2 inch or smaller gorgeous golden fruits. A blue ribbon winner at one Fair declared it one of the sweetest and best flavored cherry varieties. Disease resistant. Indeterminate stake habit

TOMATO AMISH PASTE

Heirloom. 74 days. Produces up to 12 oz., deep-red Oxheart shaped, meaty fruits. Probably one of the largest paste tomatoes which dates back the the turn of the century and is the best for sauces and canning. Not overly acidic. Indeterminate stake habit.

TOMATO LA ROMA II VF

(F-1 Hybrid). 69 days. This improved variety offers higher yields of larger, tastier fruit on stronger plants. Vigorous, uniform plants bear an abundance of 4-7 oz. fruits. Determinate bush habit.

TOMATO BURPEE BIG BOY

(F-1 Hybrid). 80 days. Large 14-16 oz. bright red fruits. Very productive. The most popular hybrid

TOMATO BURPEE DELICIOUS

Heirloom. 77 days. Very large fruit, many 2 lbs. or more. An excellent variety of good quality and flavor. Indeterminate stake habit.

TOMATO BUSH EARLY GIRL

(F-1 Hybrid). 63 days. High yielding sister of the traditional Early Girl; but with determinate bush habit. Bright red fruit, 6-8 oz. fruits. Disease resistant. Determinate bush habit.

TOMATO CASPIAN PINK

Heirloom. 80 days. This variety was re-discovered after the cold war ended. Fruits are large, kind of flat, pink in color and have the best flavor! Fruits will average 10 ozs. with non-potato leaf foliage. Garden writers voted this the best tasting variety. Indeterminate stake habit

TOMATO LEMON BOY

(F-1 Hybrid). 72 days. The first really true yellow variety, not golden. A heavy producer of 7-8 oz. fruits that are very tasty and mild. Indeterminate stake habit

TOMATO MARGLOBE VF

Heirloom. 75 days. An improved disease resistant strain. Red fruit; smooth and solid 6 oz. fruit that is crack resistant. Indeterminate stake habit.

TOMATO MR. STRIPEY

Heirloom. 80 days. Yellow beefsteak type fruit with red-streaked flesh. Large flavorful fruits range from 14 oz. to 3 lbs. Also called Old German or Pineapple. Indeterminate stake habit.

TOMATO NEW GIRL

(F-1 Hybrid). 62 days. Better tasting and more disease resistant than Early Girl, well worth trying. Fruits are 4-7 oz., and hold their ripeness and flavor on the vine well. Indeterminate habit

TOMATO OXHEART

Heirloom. 90 days. Extra large, heart-shaped reddish-pink fruit, few seeds, mild flavor. Fine variety. Non-acid. Indeterminate stake habit

TOMATO PATIO F

(F-1 Hybrid). 70 days. A sturdy, dwarf, upright plant with dark crinkled foliage. Medium size deep oblate shaped fruit with good color, smooth firm fruit of quality. Grows 24-30 in. tall and should be staked. Fine for growing in tubs and containers for the gardener with limited space. Disease resistant. Determinate bush habit.

TOMATO PINK GIRL VF

(F-1 Hybrid). 75 days. Beautiful 8 oz. pink fruits that are crack resistant. Disease resistant . Indeterminate stake habit

TOMATO PONDEROSA PINK

Heirloom. 88 days. Large, purplish-pink fruit, mild flavor. Indeterminate stake habit.

TOMATO RUTGERS VF

Heirloom. 75 days. An improved disease resistant strain. Fruit is 6 oz. bright red; globular with smooth, thick walls that are crack resistant. Determinate bush habit.

TOMATO STRIPED GERMAN

Heirloom. 78-90 days. A flat, medium to large, variably ribbed-shoulder fruits are yellow with red stripes. The marbled interior looks beautiful sliced. Complex, fruity flavor with a smooth texture. Indeterminate stake habit.

TOMATO SUPER FANTASTIC VFN

(F-1 Hybrid). 70 days. A heavy producer of 10 oz. smooth, solid, red, meaty fruits throughout the summer. Disease resistant. Indeterminate stake habit.

TOMATO CLUSTER GRANDE

(F-1 Hybrid). 63 days. Fruits are larger than traditional cluster tomatoes, about 5 oz. each. Intense brilliant red color, fine taste, high yielding and uniform ripening. Disease resistant. Indeterminate stake habit

TOMATO CRIMSON CUSHION (BEEFSTEAK)

Heirloom. 90 days. A large wilt resistant variety. Fruits are large, 12-14 oz. round, bright scarlet; solid, very profilic. Indeterminate stake habit.

TOMATO EARLY GIRL II

(F-1 Hybrid). 52 days. Very early, 4-6 oz. tasty fruit throughout the summer. Disease resistance. Indeterminate stake habit

TOMATO GERMAN JOHNSON

Heirloom. 85 days. Large, low acid reddish pink fruits. Tall plants with potato-leaf foliage. The Tomato - Johnson was named after Robert Gibbon Johnson. He was declared a hero in 1820 by eating a tomato in public in New Jersey. He attempted to greatly encourage the public acceptance of the Fruit as not being toxic or poisonous. Indeterminate stake habit

TOMATO GREEN ZEBRA

78-90 days. This is the most unusual variety you will ever grow. Fully ripened fruits are bright green, with stripes of a still lighter green. Round, smallish, 2-4 oz. fruits have an excellent real tomato flavor. Determinate habit.

TOMATO HILLBILLY

Heirloom. 85 days. Huge, mild flavored, beefsteak type fruits weigh 1-2 lbs. each, and are colored most unusual orange-yellow, streaked and mottled in shades of red and pink. Indeterminate stake habit.

TOMATO HUSKY RED

(F-1 Hybrid). 68 days. Medium sized 5-7 oz. fruits with outstanding appearance and flavor. A different type of compact plant habit called dwarf indeterminate with attractive dark green foliage that requires no pruning. Well suited for container growing and will set fruit throughout the entire growing season. Heavy yielding and disease resistant.

TOMATO JETSETTER VFN

(F-1 Hybrid). 64 days. Very early 8-10 oz., deep red oblate shaped fruits with outstanding flavor. Compare to Jet Star and you will see the difference. A high yielding variety with great flavor. Disease resistant. Indeterminate stake habit.
